A method for producing pneumatic tires using single or multiple layers of belt-like or tubular thermoplastic film for an air permeation prevention layer comprising the step of applying a viscous adhesive composition to at least a part of either a joint between the thermoplastic films or a portion between the thermoplastic film and a tire member confronting the thermoplastic film, the viscous adhesive composition containing a polymer component whose absolute values of critical surface tension difference between a rubber component of the tire member and a polymer component of a surface layer of the thermoplastic film are 6mN/m or less, respectively.
